

## New search function for partner companies

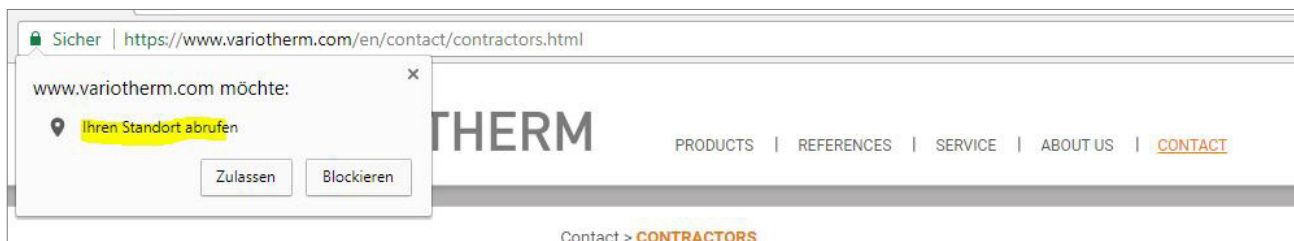

www.variotherm.com

- 1 The term supply sources has been changed to “**business partner**” or “**installation partner**”. We have added both terms to the navigation function in order to help the user. The menu items “business partner” and “installation partner” link to the same page.

In the future, there shall be no distinction between Austria/Germany/international.

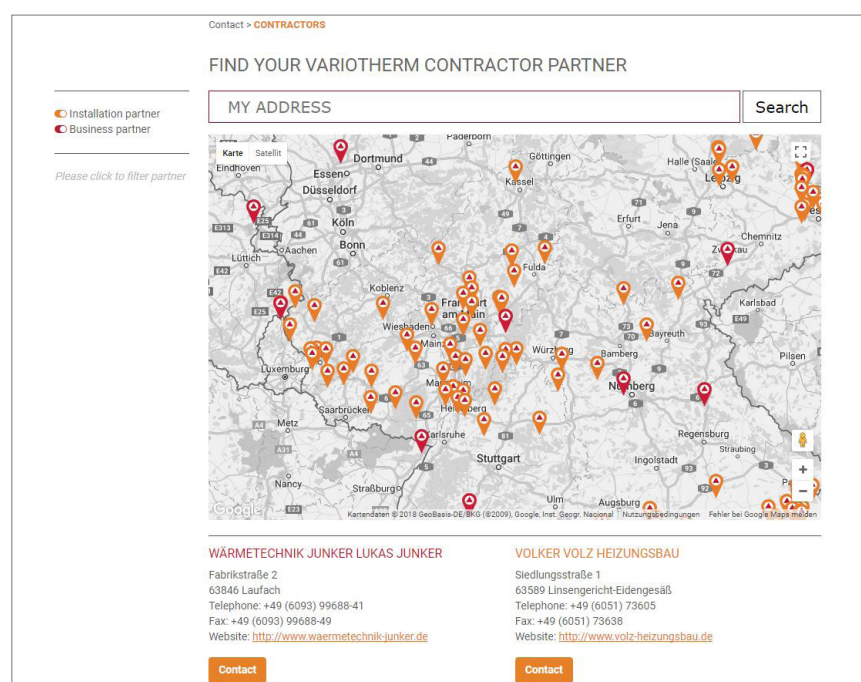

- 2 The search function was adjusted to meet the **Google Standards**. At the start, the user will be asked once if we may request their location. If the request is confirmed, results in their locality are immediately displayed.

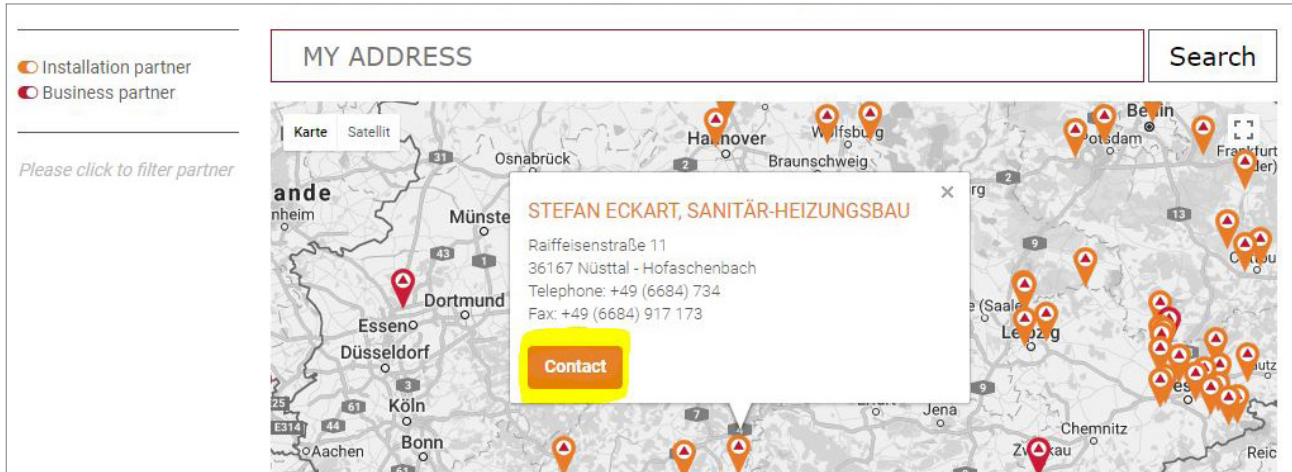

- 3 The partner companies are shown both on the map and in the list below. The zoom function expands or reduces the selection.

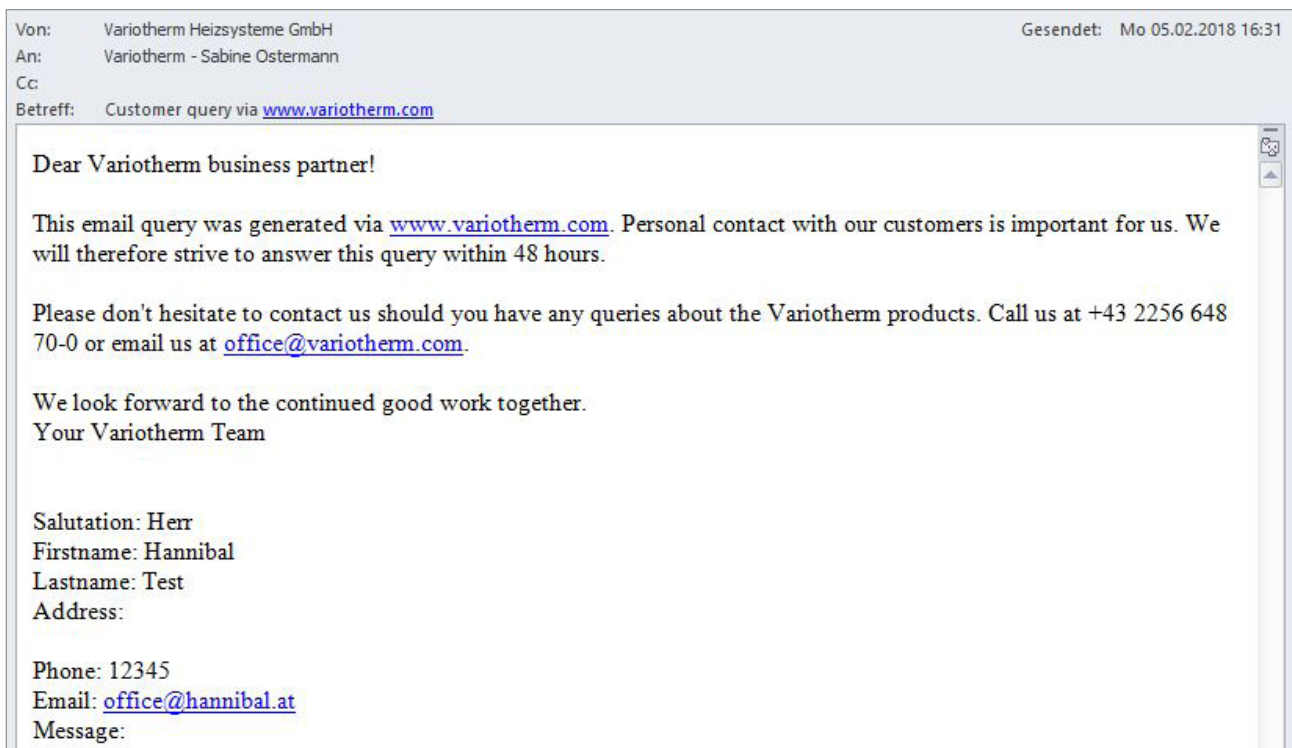

**Business partners** are indicated on the map with a **red** icon and **installation partners** are shown with an **orange** flag.

- 4 The **mouse over function** shows the name of the partner next to every icon. **If the user clicks on the flag** on the map, then the partner's address is shown. Using the request button, an email can be sent immediately to the Variotherm partner.

- 5 The data with the below information is sent **to the recipient per email**. In this way, it is clearly visible that contact has been made via our website.

- 6 By clicking on "installation partner" or "business partner" in the **selection function on the left**, they can be shown separately or all together.
